### SWITCH TO WEEKLY TRADE WITH 1-SD IF YOU ARE FAILING IN INTRADAY

Friends!

1 SD formula which is giving success in weekly forecast from past **101 weeks**. Below given weekly level for nifty future and bank nifty future for **111<sup>th</sup> Week** (i.e. 11<sup>th</sup> to 15<sup>th</sup> Dec 2017).

What is 1 SD formula? Price range= (Price \* volatility \* square root of day) /square root of 365

Trend identification as per Fibonacci principle

**Range bound trend identification:** if all up-move invites sale **above 10360** and all down move invites short covering **at 10220** level this indication is sufficient to conclude that the price action is in the range of **10360 to 10220**.

**How to trade nifty future in uptrend above 10325?** if nifty cross 10323 then you buy future with 10300 put option buy stop loss 10237 If it achieves the 1<sup>st</sup> target 10377 during the day or any point during the week revise your stop loss to 10343.50 and hold the trade. If the 2<sup>nd</sup> target 10400 achieved revise the stop loss to 10360 and hold the trade. If the 3<sup>rd</sup> target 10414 achieved, then trail or revise the stop loss to 10400. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

**How to trade nifty future in Down trend below 10257?** if nifty fall below 10257 then you sell with 10250 calls option buy stop loss 10344. If it achieves the 1<sup>st</sup> target 10204 during the day or any point during the week revise your stop loss to 10236 and hold the trade. If the 2<sup>nd</sup> target 10180 achieved revise the stop loss to 10220 and hold the trade. If the 3<sup>rd</sup> target 10166 achieved, then trail or revise the stop loss to 10180. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

**Note:** I am using the call long simple option strategy to demonstrate hedging principle in trade. However, you can write the option also and do any complex strategy to protect the trade.

If your trade is with the option hedge and future has reached the stop loss, then do not quit the trade in hurry better wait for conclusive price crossover of 0.382 retracement
