SWITCH TO WEEKLY TRADE WITH 1-SD IF YOU ARE FAILING IN INTRADAY

Friends!

1 SD formula which is giving success in weekly forecast from past **86 weeks**. Below given the weekly level for nifty future and bank nifty future for **95th Week (i.e. 21st to 25th Aug 2017)**.

What is 1 SD formula? Price range= (Price * volatility * square root of day) /square root of 365

$$=(9849.7 \times 0.0906 \times \sqrt{7}) / (\sqrt{365})$$

Trend identification as per Fibonacci principle

1sdprice range		123.582	
Nifty		9849.7	
Nifty future Trend expectation			
0.236	29.165	9878.87	9820.53
0.382	47.208	9896.91	9802.49
0.5	61.791	9911.49	9787.91
0.618	76.373	9926.07	9773.33
0.786	97.135	9946.84	9752.56
0.888	109.74	9959.44	9739.96
1.236	152.75	10002.4	9696.95
1.618	199.96	10049.7	9649.74

Trend expectation as per 1SD method: Uptrend conformation 9879, successful cross over above 9926 will target 9947-9959-10002. Down trend conformation 9821 successful fall below 9773 will trigger fall till 9753-9740-9697-9650.

Range bound trend identification: if all up-move invites sale above 9911 and all down move invites short covering at 9788 level this indication is sufficient to conclude that the price action is in the range of 9911 to 9788.

Above levels are weekly levels hence hedge the position with option for better money management. For intraday use, our 1SD paid software or 1SD mobile App.

How to trade nifty future in uptrend above 9879? if nifty cross 9879 then you buy future with 9900 put option buy. If it achieves the 1st target 9911 during the day or any point during the week revise your stop loss to 9897 and hold the trade. If the 2nd target 9947 achieved revise the stop loss to 9897 and hold the trade. If the 3rd target 9959 achieved, then trail or revise the stop loss to 9947. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

How to trade nifty future in Down trend below 9821? if nifty fall below 9821 then you sell with 9850 calls option buy. If it achieves the 1st target 9773 during the day or any point during the week revise your stop loss to 9802 and hold the trade. If the 2nd target 9753 achieved revise the stop loss to 9802 and hold the trade. If the 3rd target 9740 achieved, then trail or revise the stop

loss to 9753. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

Note: I am using the call long simple option strategy to demonstrate hedging principle in trade. However, you can write the option also and do any complex strategy to protect the trade.

If your trade is with the option hedge and future has reached the stop loss, then do not quit the trade in hurry better wait for conclusive price crossover of 0.382 retracement
